I have found the DVD’s to be so valuable in so many ways. I have used them as a staff training tool, a quick reference guide for staff when they are teaching a particular skill or learner, and have also used them for parent training. I would highly recommend the DVD’s for your library of resources, whether you are a private practitioner or a publicly funded centre/school.

Laura Campbell, MA, Clinical Supervisor
Southeast Regional Autism Intervention Program
Kingston, Ontario, Canada

Establishing Operations, Inc. videos on DVD clearly and practically demonstrate effective verbal behavioral teaching – which can be used by parents, teachers and therapists alike. They are like having a personalized hands-on workshop, providing definitions and concrete examples of the ins and outs of a verbal behavior program.

Each DVD is a practical guide to teaching techniques for children and adolescents with Autism, Aspergers, PDD-NOS, Nonverbal Learning Disorder, and developmental delays. For those wishing to learn how to implement or optimize a Verbal Behavior program, this is the series you’ve been waiting for.

These videos are helpful for trainers of all experience levels. They contain basic terminology and procedures for those just beginning in the VB field, but also contain terrific tips for even the most experienced trainers.

Sharon Older, Ph.D., BCBA
Executive Director
Adapt Behavioral Services
The NET DVD’s and Teaching Tactics DVD are great for ongoing staff training. These are used after staff feel confident in the application of the basic principles and have been a great resource for further training and development.

The EO, Inc. "Getting Started" DVD was a very useful tool that gave us a thorough introduction to Verbal Behavior strategies which we can apply hands on immediately. It was informative and helpful and was well presented, and also a great way to educate our support network of therapists.

"Getting Started" explains, in detail, how to establish instructional control with even the most difficult of learners and how to arrange the teaching environment so that your child enjoys teaching. This DVD describes literature-based teaching variables that assist in achieving the optimal learning environment and error correction methods.

You will learn effective teaching strategies and watch a live teaching demonstration. DVD is a little over 1 hour in duration.

"The Teaching the Mand DVDs are my particular favourites. We all know how important consistency in prompting and fading are when teaching the mand, and this resource enables that consistency to be achieved. It was a fabulous idea, exceptionally executed. Our team review the DVDs regularly and are provided with their own set to watch when they join us and then at leisure!

J. Evans, Parent, Ohio

Director of Step by Step School, UK

This DVD is designed in the same manner, uses the same teaching techniques and provides the same depth of information as Teaching Vocal Manding.

This DVD is over one hour in duration.

"Teaching Manding Using Sign Language" explains how to teach your child to request items in the same manner as Vocal Manding, using sign language instead. This DVD is specifically created to help parents and professionals teach non-vocal children to use sign language to ask for things that they want.

This DVD is designed in the same manner, uses the same teaching techniques and provides the same depth of information as Teaching Vocal Manding.

This DVD is over one hour in duration.

GIVING A VOICE TO THOSE WITHOUT

TEACHING VERBAL BEHAVIOR IN THE NATURAL ENVIRONMENT: TEACHING VOCAL MANDING

$89.00

NOTE: If you are ordering the 2 Disk Set, this disk is included and should not be ordered separately.

“Teaching Vocal Manding” explains how to teach your child to request items beginning with many prompts and then how to fade your prompts systematically so that your child can learn to ask for things independently and spontaneously. Creators and behavior analysts Holly Kibbe and Cherish Twigg explicitly define each type of mand and clearly demonstrate how to teach them. In addition, video examples of actual children learning each type of mand are shown. You will learn what is and what is not natural environment teaching as well as how to teach the mands in the natural environment. It also provides important guidelines to teaching the mand, prompt fading strategies, strategies for problem solving and how to make manding easy and fun for your child.

This DVD is over one hour in duration.

ABOUT THE COMPANY

Establishing Operations (EO, Inc.) was created to teach meaningful language to children with autism and other developmental disorders, using applied behavior analysis (ABA) methods. We also offer training via live workshops and informative DVDs for both parents and professionals. We want to give every child a voice and the means to engage with others. Since a lack of language skills is often connected with difficult behavior outbursts, our teaching addresses both areas. We currently serve clients in the U.S., Canada, U.K., Bermuda, Germany, India, and Italy.

The EO, Inc. team includes leaders with extensive ABA training and experience working with VB pioneers.

Holly Kibbe, MS, BCBA,
Managing Partner and co-founder
Cherish Twigg, MS, BCBA,
Managing Partner and co-founder

Both managing partners have worked in the field of autism and behavior analysis for more than a decade. Both have worked as teachers, therapists, consultants and presenters.

Members of the Association for Behavior Analysis International and the Association of Professional Behavior Analysts
